

# Professional CCTV solutions for petrol stations

NOVUS® CCTV systems ensure the highest level of security and safety for people and objects. NOVUS® products are specifically designed to integrate the security systems of a petrol station with its existing infrastructure, such as petrol pumps and cash registers, depending on the requirements of the customers. For each petrol station, the sophisticated NOVUS® software facilitates the creation of an individual monitoring system operated remotely from a distant control center.

-  >> NOVUS® color and day/night speed dome cameras with 18x, 22x or 26x optical zoom, programmable patrols, tours, patterns and privacy zones facilitate systematic and automated monitoring of the whole petrol station area.
-  >> The NV-KBD60 system keyboard has been designed to conveniently operate Novus DVRs, speed domes and other cameras from one control panel. Flexible grants configuration for 9 users ensures that only the right persons can access assigned functions.
-  >> The NVC-HC370HZL-2 color camera with a built-in motor-zoom lens (22x optical zoom) in a robust aluminum housing allows the operator to monitor a larger area and make close-ups of car number plates or faces when needed.
-  >> The NVC-825DN/NVC-860DN day/night compact cameras with a mechanical IR cut filter and advanced image enhancement systems ensure unparalleled observation in low light conditions. For night viewing, these cameras can be used with IR illuminators.
-  >> The NOVUS® 5000 Series DVRs offer an advanced monitoring schedule, many alarm and backup options, a self-diagnostic function and a user-friendly interface. All this accounts for their extreme efficiency and reliability.
-  >> NOVUS® dome cameras and vandal proof cameras in day/night and color versions guarantee excellent image quality and object recognition. The sturdy housings of vandal proof cameras ensure continuous operation regardless of circumstances.
-  >> All service, monitoring, backup and system functions of NOVUS® DVRs can be executed remotely via network with the help of the dedicated software. It is also possible to control PTZ, zoom and day/night cameras the same way.
-  >> NOVUS® CCTV monitors facilitate fatigueless and long-lasting observation of the scene. Connecting up to 4 spot monitors to a single NOVUS® DVRs helps the CCTV operator to efficiently monitor the whole petrol station area.
